Same walls. Same brand. *A different company* underneath.

What the prior era built. What the new era built. And what we kept on purpose.

THEN · PRIOR OWNERSHIP

A brand ahead of its *engine*.

World-class creative and innovation no one else could touch — but the operation was never built to carry the brand at scale.

BRAND · R&D	Iconic. Truffles, bars, bacon bar, PB-PB cup.
SYSTEMS	15-year-old CMS · Nutracoster recipe tool, 20+ yrs · islands of data.
FLOOR TOOLS	Paper pick lists. Paper counts. Rekeying everywhere.
QA	Manual inspection. Errors caught downstream — often after shipment.
CAPACITY	~1,675 orders/day peak · manual-heavy · single carrier.
COST / SHIP	$34.47 avg · legacy pricing · no carrier optionality.
SERVICE	Customer replies averaged 24–48 hours.

> *"The PB-PB cup never left a kitchen recipe." The creative was there. The chassis to ship it wasn't.*

NOW · CURRENT OWNERSHIP

The brand, *plus the engine it deserves*.

Same building. Same team DNA. A modernized operational spine — connected systems, instrumented floors, simpler choices at every step.

BRAND · R&D	Kept intact. Innovation calendar protected — the reason you buy Vosges.
SYSTEMS	Current-gen MRP retires the 15-yr CMS · Flavor Studio AI recipe platform replaces Nutracoster.
FLOOR TOOLS	Tablets & scanners on every station. Paper usage cut by 50%.
QA	98.2% pick accuracy (Gorgias FY25) · checkweigher + scan-verified · errors caught pre-seal.
CAPACITY	~3,120/day sustainable.
COST / SHIP	$24.07 avg (FY24 DTC) | $18.38 avg (FY25 DTC) — carrier simplification + negotiation.
SERVICE	Under 1-hour first-response with Gorgias + 24/7 virtual agents.

> *What we kept on purpose: the creative, the flavor R&D, the brand voice. None of the upgrade touched the product.*

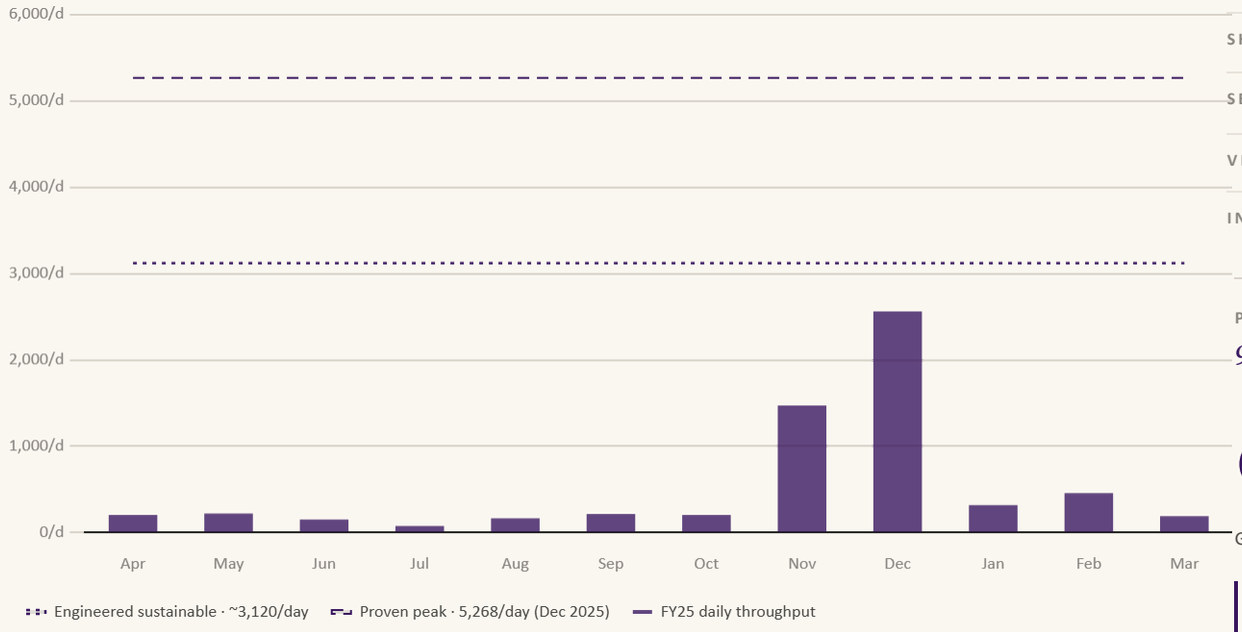
EXHIBIT · CAPACITY ALREADY BUILT

Proven to 5,268/day. Engineered to sustain *~3,120*.

FY25 monthly daily average throughput (ShipStation) against the single-day peak we've proven and the ceiling we've engineered. December 2025 averaged 2,563/day and peaked at 5,268 — on the same footprint that capped at 1,675/day in 2023.



MONTHLY FY25 · SAME BUILDING · SAME RACKING · SAME CREW

WHAT THE MODERNIZATION DELIVERED

MRP	Retired the 15-year CMS; current-gen MRP in its place.	*1 stack*
RECIPE	Flavor Studio replaces Nutracoster (20+ yrs) — AI at the bench.	*Next-gen*
FLOOR	Tablets & scanners at every station. Paper −50%.	*Every station*
SHIPPING	Carrier simplification. Ice & unboxing standardized.	*−47% $/ship*
SERVICE	Gorgias + 24/7 agents — answered under the hour.	*24–48h → 1h*
VISIBILITY	Live dashboards. 24/7 automated audits. Data-driven decisions.	*Always-on*
INTEGRATION	Every system talks to every other system.	*One graph*

PICK ACCURACY · GORGIAS FY25

98.2% of shipped orders — no customer-reported issue.

98.2%
GORGIAS TICKET RATE · FY25

Held the line during the rebuild. *Q4 2025 — the quarter we re-sequenced the pick line — shipped record holiday volume (Dec 2025: 61,503 shipments, peak 5,268/day) without degrading the accuracy floor.*

Faster. Simpler. *And then — portable.*

An $80,000 investment that pays itself back in twelve weeks — and teaches us how to wire the next warehouse in a week, not a year.

PHASE TWO · ON THE LINE

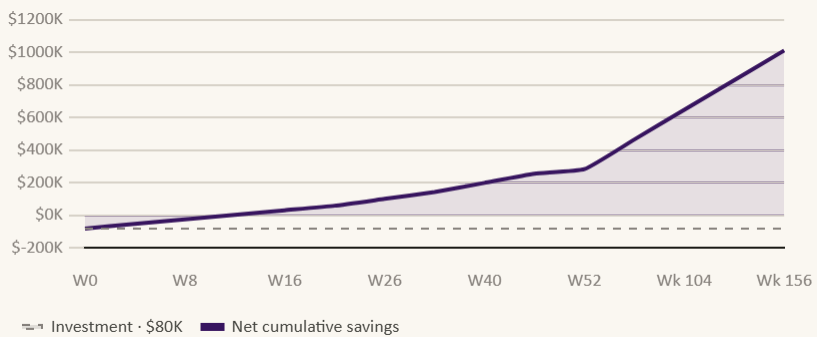
The things that still look *manual.*

Gift orders	Dedicated box-maker station at the line's head. Gift-note printed on scan — never missed again.
QA stop	QA & Organizer merge into one role. One person owns the box before it moves.
Sealing	Auto-sealer replaces manual tape & fold. Seasonal rental — paid back in one peak week.
Labeling	Three-tap ShipStation Mobile retired. Auto peel-and-apply labeler takes over.
Boxes	Sizes re-aligned to FedEx One Rate tiers. New SKUs require box-team approval.
Bedding	Pre-cut, known-weight. The checkweigher stops guessing; shipping math becomes exact.

THE MATH · CUMULATIVE $ THROUGH THE DOOR

$80K out. *$1.1M back.*

Wk 12	Wk 52	Yr 3
BREAK-EVEN	+$284K NET	+$1M NET



Read it this way — *every line of cost stays flat; every line of savings stacks. The curves cross at week twelve. Everything after is structural margin on the P&L.*

AND THEN — THE REAL UNLOCK

A template that *travels.*

Chicago — HUB · FULL SKU
Node II — SUBSET
Node III — SUBSET

Every simplification on this line is a step toward a *standard* — something we can wire somewhere else.

A *portable warehouse template.* Light up a second location to fulfill a subset of products — closer to the customer, faster to deliver, cheaper to ship.

Not a bigger building. A smarter network.

Simplify first. Replicate second. The next warehouse is a configuration, not a construction project.
